

**SPRINKLE SPRAY** (Pty Ltd)  
Reg. Nr. 2016/339513/07

# What does **Sprinkle** **Spray** do for My Facility?

**Sprinkle Spray** helps to **Effectively Limit Cross Infection in High-Foot Traffic Zones** by using the **Latest Disinfecting Application Technology**

Unique Application Method that Sends Millions of Charged Molecules to All Areas

Washing Hands and Cleaning is not Enough as Bacteria are Living Organisms that Migrate from Surface to Surface

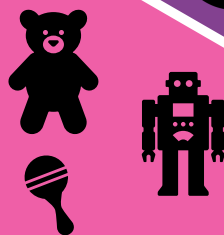

A Disinfectant Microfilm is left on the Surface that Stays Active for Days as their Method doesn't leave any Residual Moisture Behind

Sprinkle Spray focuses on Creating a Healthier Environment at my Facility and Eliminates Bacteria on All Surfaces Weekly

The Microfilm helps to Shield Surfaces and Objects from Bacteria which leads to Reduced Chances of Cross-Infection

Soft Toys, Puzzles, Baby Cots, Beds, etc are Sprayed too as their Disinfectant is Non-Toxic and Safe to Use
